### ***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 37-39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Page 5 lines 5 and 6 state that the computer-readable signal-bearing medium may be a carrier signal. A computer readable medium is not statutory when the medium is disclosed as being solely a carrier signal. Signals do not fall into any of the four statutory categories of invention. They do not set forth steps or a procedure and therefore cannot be a process. A signal is not a machine because it has no physical structure and cannot itself perform

a useful, concrete, and tangible result. A signal is made up of energy, not matter, and therefore is not a composition of matter. Lastly, a manufacture requires physical substance, which a signal does not have. Consult pages 55-57 of the guidelines available at:
